DETAILED ACTION

Allowable Subject Matter

1. Claims 9, 12, 15-30, and 44-48 are allowed.

2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the above listed claims, in light of the specification and the applicant's amendments filed October 26th, 2006, the Examiner finds that the prior art does not teach all of the limitations of the specified claims in combination with the other elements presented.

Specifically, the prior art of record fails to teach a device abstraction layer using a single protocol as a unified communication interface to communicate with a content program abstraction interface, *in combination with* a first and second proxy, each communicating with network devices with their own respective protocols. This limitation, in combination with the claimed content location system, notification system, and client application outlined in the independent and dependent claims, is patentably distinct from the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
